

One-Stop Shop for automation:

Our customers access comprehensive solutions for all their automation needs. From standard or custom solutions to robotic operations, our one-stop approach simplifies procurement and integration processes.

Global distribution partners:

Our global network of system partners ensures that innovative automation solutions reach a global market efficiently, providing local support wherever clients are located.

Innovation in applications:

The partnership could lead to innovative applications in manufacturing, logistics, and other sectors, where our modular solutions support the dynamic capabilities of modern robotics. Our solutions are designed for human-robot collaboration, enhancing workplace safety while minimizing risks in shared work environments

Integrated Automation Systems:

Combining MayTec's modular systems with Techman's collaborative robots leads to seamless, integrated automation solutions, tailored for various industrial applications.

Rapid deployment:

Our combined products allow for quicker deployment of automation solutions while speeding up project timelines.

Enhanced customization:

Our alliance offers our customers unprecedented customization options, allowing for tailor-made automation setups that match specific operational requirements and space constraints.

Increased efficiency:

Techman's cobots, known for their innovation, precision and adaptability, paired with MayTec's products and solutions, significantly enhance workflow efficiency, reducing setup times and operational costs.

Commitment:

Our positive attitude and our commitment to absolute customer satisfaction ensure that we own every project from start to launch and beyond. We're not hiding behind a website, and we're in touch with customers on a regular basis. We always stand behind our products and solutions!

TM ROBOT & MAYTEC

Together – we're pioneering the future of industrial automation!
